

FOR IMMEDIATE RELEASE

For almost 40 years, National Road Utility Supply, Inc. has promised our customers “Service is what we do best.” And in keeping that promise, we have recently joined forces with CITCO Water to not only continue our exceptional service, but also expand our current inventory of premier products to include the full array of products, services, and technology CITCO Water has available.

“The teaming up of NRUS and CITCO Water is the perfect union of two companies with excellent reputations, products, and services to help all customers solve their daily problems.”

NRUS + CITCO Water

It’s not often two legacy distributors in the water works industry team up together to help their customers solve their daily problems. Two companies with long-standing relationships and great reputations with quality products join forces to enhance expertise, solutions, and product offerings.

It’s a very exciting time. At NRUS, we built our foundation supplying high-quality water works materials for our customers. By joining CITCO Water, not only are we able to enhance our end-to-end solutions for our contractor customer-base that we’ve built over the last 40 years, but are also able to offer all the solutions our municipal customers need “to take water from the source, to the consumer, and return it to the source.”

CITCO Water – Solutions driven. Commitment given.

We have every SOLUTION the water works industry needs—chemicals, meters, engineering and technology, inventory management, Smart City capabilities, pipes, valves, fittings, and repair.

We are COMMITTED in everything we do as your partner—taking care of your needs and expectations, every step of the way.
